

# Landscapers

## Description:

**Landscapers Mix** a blend with good seedling vigor, fast establishment, and excellent wear tolerance. An excellent spring green-up with great heat and drought resistance makes it widely adapted throughout the cool humid regions of North America. Good resistance to most turf grass foliar diseases with a dense turf, that is able to withstand lower mowing. Its aggressive rhizomes and good tillering ability allows for rapid filling of bare areas. Great wear resistance and slow vertical growth makes it suitable for parks, playgrounds, home owners, and highway departments.

## Formulation:

*Clearwater Kentucky Bluegrass*  
*Fiji Perennial Ryegrass*  
*Kokomo II Perennial Ryegrass*  
*Cabo II Perennial Ryegrass*

## Characteristics:

*High turf quality*  
*Medium dark green color*  
*Good disease resistance*  
*Great heat, drought tolerant*  
*Excellent seeding vigor*  
*Fast establishment*  
*Excellent for over seeding*

**New Seeding Rate:** 6-8 lb. per 1000 sqft  
 270-360 LBS Per Acre

**Over Seeding Rate:** 3-4 lb. per 1000 sqft  
 135-180 LBS Per Acre

Establish Rate Days	Mowing Frequency	Traffic Tolerance	Thatch Production	Nitrogen Required	Shade Tolerance	Cold Tolerance	Drought Tolerance
7-10 Days	2 x week	Good	Low-Med	Medium	Good	Good	Good
