

Pro Turf

Description:

Pro Turf Mix is a blend of cool-season, long-lived, highly palatable, perennial grass with a smooth, soft, green to dark green appearance. It spreads via rhizomes to form a dense sod and grows best during cool, moist weather on well-drained, fertile soils. It creates excellent turf density and has good mowing quality. Adaptable to a wide variety of climate range and has good resistance and a very low maintenance lawn.

Formulation:

Kentucky Bluegrass
Hood Chewings Fescue
Creeping Red Fescue
Kokomo II Perennial
Cabo II Perennial Ryegrass

Characteristics:

Very adaptable to variety of climates
Medium dark green blends well
Great heat and drought tolerance
Fast spring green up
Good resistance to stem and leaf rust

New Seeding Rate: 6-8 lb. per 1000 sqft
 270-360 LBS Per Acre

Over Seeding Rate: 3-4 lb. per 1000 sqft
 135-180 LBS Per Acre

Establish Rate Days	Mowing Frequency	Traffic Tolerance	Thatch Production	Nitrogen Required	Shade Tolerance	Cold Tolerance	Drought Tolerance
7-10 Days	2 x week	Good	Low-Med	Medium	Good	Good	Good
