

Shady Mix

Description:

Shady Mix is a blend that will create a top quality turf designed for shady areas, whether it is in your back yard or in a wooded campground, will create a lush green lawn even in the shade. All varieties selected for this mixture are very low maintenance. It does not require much fertilizer and does not need excessive amounts of water. A high mowing cut is recommended. Fescue has a high tolerance for cold temperatures and shade, moderate tolerance for drought and wear, and low tolerance for heat.

Formulation:

Kentucky Bluegrass
Chewings Fescue
Creeping Red Fescue
Kokomo II Perennial
Cabo II Perennial Ryegrass
Fiji Perennial Ryegrass

Characteristics:

Moderate tolerance for drought
Low tolerance for heat
Performs well in northern states
